

PORTABLE, EMERGENCY AND TEMPORARY HEATING & AIR CONDITIONING INDUSTRIAL HEPA FILTRATION

ASHEPA 2000 Industrial HEPA Filtration Unit

The ASHEPA is designed for Construction and Industrial HEPA filtration. This unit can have as many as five layers of filtration. It is designed to keep the environment clean, filter out the incoming air and to filter air rejected to the exterior of your space. This unit is ductable, portable and made for construction duty.

The unit is mobile on casters. It is delivered to the job site, placed and positioned and test run prior to job start up. The unit is readily moved from space to space. It is able to be ducted in or out or used in a recirculation capacity. The unit is two speed providing sufficient air movement for all applications of a contractor or production environment.
