

## PORTABLE, EMERGENCY AND TEMPORARY HEATING & AIR CONDITIONING INDUSTRIAL DEHUMIDIFIER UNIT

### **ASHD200** Industrial Dehumidifier Unit

The ASHD is designed for Construction Dehumidification. This unit has low grain low temp refrigeration components which allow it to operate both in unheated spaces and overheated spaces and still extract water from the space floor, walls, ceiling and materials.

The unit is mobile on casters. It is delivered to the job site, placed and positioned and test run prior to job start up. The unit is readily moved from space to space. It is able to be ducted in or out or used in a recirculation capacity. The unit is two speed providing sufficient air movement for all applications of a wet environment.

The unit is used for dehumidification and preliminary filtration primarily in areas that have been wetted or are experiencing process moisture beyond spec.

- **Voltage:** 120v/1ph
- **Amps:** 6.5
- **Height:** 33"
- **Width:** 20"
- **Depth:** 20"
- **Weight:** 110#
- **Oper. Range:** 33 deg. F - 105 deg. F

**Built in Controls:** Include auto run, auto pump and manual purge, variable speed, hour meter, unit on casters, readily ducted, large transport wheels, condensate hose, Merv 7-11 filtration, construction capacity.

**Application:** Construction, Process application, Tenant improvement, Sheet Rock, Flood, Mold, Remodel

**AIR SYSTEMS SALES & RENTALS: 503-635-9670**
